### **DETAILED ACTION**

This Office Action is in response to the Application filed September 19, 2006.

#### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a. Species a, as shown in Fig. 10.
- b. Species b, as shown in Fig. 11.
- c. Species c, as shown in Fig. 13.
- d. Species d, as shown in Fig. 14.

The subspecies are as follows:

- I. Subspecies I, light sensitive device being a phototransistor, Fig. 12.
- II. Subspecies II, light sensitive device being a PIN or NIP diode.
- III. Subspecies III, light sensitive device being a Schottky diode.

The sub-subspecies are as follows:

- i. Sub-subspecies i, a glass substrate.
- ii. Sub-subspecies ii, a substrate comprising a metal foil and insulating dielectric layer.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1, because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The common features as set forth in claim 1 do not show an inventive concept over the prior art as evidenced by Young et al. (WO 01/99191), which shows all the limitations of claim 1.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAY C. KIM whose telephone number is (571)270-1620. The examiner can normally be reached on 7:30 AM - 5:00 PM EST.
